

DOCUMENT #3 OF 10 — UX & LOGIC ARCHITECTURE

App Flow & User Journey Specification

Complete Step-by-Step Experience, Navigation Rules, Primary Actions & Edge States

Journey Pattern	Primary Persona	Secondary Persona	Document Version
Goal-Oriented Linear & Sub-Tree	Corporate HR & Engineering Recruiter	Applicant / Interviewee	v1.0 (Production Blueprint)

1. High-Level End-to-End User Journey Flow

2. Core Pages & Logic Flow Breakdown

Screen Name	User Actions & Logic Flow	Primary Goal & Hierarchy
1. Welcome & Landing	Interactive demo card, feature overview, CTA click triggers Supabase OAuth / Email modal.	Conversion: Educate visitor and route to login in < 2 clicks.
2. Auth Modal / Page	User enters email/password or chooses Google/ Apple OAuth. Token saved; redirect to Dashboard.	Security: Fast sign-in, instant session creation with active RLS tenant context.
3. Recruiter Dashboard	Top metric tiles (Resumes parsed, Shortlisted, Avg match score), project list, recent activities.	At-a-Glance Status: Instant visibility into hiring pipeline health.
4. Project & Job Studio	Define JD criteria, mandatory vs. optional tags, candidate geolocation map (Leaflet.js).	Scoping: Establish ground-truth evaluation benchmark for AI matcher.
5. Bulk Ingestion Task	Multi-file drag-and-drop (PDF/DOCX). Real-time progress bar with Supabase Storage upload.	Ingestion: Seamless zero-lag file batch staging.
6. AI Assistant & Ranking	Live leaderboard, candidate breakdown cards, missing skills badge, Claude-style chat assistant.	Decision Support: Rank 1..N candidate evaluation with AI justification.
7. Virtual Interview Studio	AI-guided interview room with browser Web Speech voice-to-text live transcribing.	Validation: Real-time technical depth scoring.
8. Payment & Upgrade	Tier selector (Free Tier, Pro Recruiter, Enterprise), credit purchase, checkout flow.	Monetization: Scalable tier unlock with instant receipt confirmation.

3. Navigation Rules & Interaction Behaviors

Standard Navigation Rules

- **Back / Next:** Breadcrumb-driven navigation with URL state preservation (React Router). Form progress saved automatically.
- **Cancel / Close:** Prompts confirmation dialog if unsaved form data exists; otherwise dismisses drawer/modal immediately.
- **Submit / Save:** Triggers optimistic UI feedback, disables double-click, and invalidates stale Supabase queries.
- **Tab Bar:** Persistent desktop sidebar & responsive mobile bottom nav.

Primary Action Trigger Matrix

- **"Get Started":** Opens Auth modal with autofocus on Email input.
- **"Explore Demo":** Opens interactive preview sandbox without auth.
- **"Save & Parse":** Initiates background batch parsing with toast tracker.
- **"Upgrade Plan":** Opens modal with instant feature diff table.
- **"Export / Share":** Generates downloadable PDF candidate report.

4. Edge Cases & Resilience Handlers

Edge State Scenario	System Behavior & Detection	User Recovery Path
No Internet / Offline	<code>window.navigator.onLine</code> event listener triggers global sticky warning bar.	Auto-reconnect with local optimistic queue retries when connection recovers.
Session Expired	Supabase Auth returns 401 Unauthorized on expired JWT token.	Silent refresh token attempt; if expired, show re-auth modal preserving draft form state.
Empty States (Zero Resumes)	Empty query return for selected job/project.	Displays illustration with direct action button: <i>"Upload First Resume"</i> .
Corrupted Resume File	File upload contains unparseable binary or password-protected PDF.	Flags specific file with warning badge: <i>"Unable to parse — Re-upload clean PDF"</i> .
Permission Denied (403)	User attempts to view a candidate outside their organization workspace.	Shows <i>"Access Restricted"</i> screen with button to contact Team Admin.
